

ISO 55001

Asset Management Consulting Services

We specialise in the technical understanding and application of ISO 55001 across all markets and asset classes. Our Certified Assessors and their experience in infrastructure asset management will ensure your organisations 'system' for managing assets is aligned with this Standard.

QUALIFIED

Opus in Australia have several Certified Asset Management Assessors (CAMA) for ISO 55001, who were among the first in Australasia to achieve this qualification.

One of our Assessors is also certified to support Conformance Assessment Bodies (ISO Independent Auditor) in providing the technical assessment for ISO 55001 Certification.

EXPERIENCED

Opus participated in the development of this International Standard and has already delivered a number of ISO 55001 specific projects and assessments.

ISO 55001 is the result of collaboration from asset management practitioners and experts worldwide, including us. The standard uses asset management principles to balance asset performance, risk, and costs associated with delivering asset value – whether that be a financial return from asset investment or asset-based services to a community.

We offer a number of services with respect to ISO 55001 including:

- a) Awareness workshops and training;
- b) Asset Management System maturity assessments;
- c) ISO 55001 consulting services; and
- d) Technical assessments in support of ISO Independent Auditors.

Awareness Workshops and Training

We work closely with our clients to develop organisation specific workshop materials and presentations including:

- Market awareness
- Requirements of the Standard
- Value to your organisation
- Self-assessment process
- Independent maturity assessment methodology

Asset Management System Maturity Assessments

The purpose of the Asset Management System Maturity Assessment is to determine if the organisation has produced sufficient evidence to demonstrate compliance with the ISO 55001 requirements. Some organisations will realise value in alignment with this Standard as opposed to pursuing full certification. Opus has developed an assessment process that measures the organisations current status with respect to the Standard's requirements. This process also considers Value for Effort in meeting the requirements of the Standard specifically for organisations looking to only align their asset management system.

The Opus assessment process is consistent with the framework provided by IPWEA and the Asset Management Council of Australia.

ISO 55001 Consulting Services

Opus provides asset management services that are directly related to the requirements of ISO 55001 and the performance of organisation's assets. These services include:

- Asset management policy
- Asset management objectives
- Strategic Asset Management Plan
- Asset Management Plans
- Infrastructure asset management

ISO 55001 Auditing Services

Opus assist ISO Auditors in assessing technical conformance to the requirements of the Standard.

ASSURANCE

This recognised role provides clients with the assurance that Opus' consulting services are validated and compliant with the formalised ISO auditing process.

Organisational Context

Understanding the organisation and its context

Does the organisation understand the organisation and its context?	Artifact	Impact	AMS Maturity Assessment				Priority
			Compl	Prog	Part	Nil	
Has the organisation determined the relevant <i>external</i> and <i>internal</i> issues relevant to its purpose and that affect its ability to achieve intended outcomes?	Business Plan	M		X			3
Are the AM Objectives, within the SAMP, aligned to and consistent with organisational objectives?	SAMP	H				X	1

Understanding the needs and expectations of stakeholders

Does the organisation understand the needs and expectations of stakeholders?	Artifact	Impact	Compl	Prog	Part	Nil	Priority	
Has the organisation determined the stakeholders that are relevant to its AMS?	SAMP	M			X		3	
Has the organisation determined the requirements and expectations of stakeholders with respect to AM?		L			X		3	
Has the organisation determined the criteria for AM decision making?		H					X	1
Has the organisation determined the stakeholder requirements for recording and reporting financial and non-financial information relevant to AM?		L					X	3
